A close-up, dark-toned photograph of a quilted gilet. The focus is on the zipper pull, which is a rectangular metal piece with a stylized 'N' logo. The gilet has horizontal quilting and a textured fabric. The lighting is dramatic, highlighting the texture of the fabric and the metallic sheen of the zipper pull.

RECYCLED FABRIC

Developing and producing within the textile industry, as well as in many other industries, has an impact on our environment.

At Nimbus, we are continually working towards an enduring sustainable strategy, minimizing the consequences of our activities.

We are constantly striving to develop long-lasting products both in regards to quality as well as design, while at the same time sourcing materials and finding production methods that reduce our environmental footprints.

T-SHIRTS

MONTAUK | DANBURY

”

A classic and comfortable t-shirt
is the foundation of all wardrobes

THE ESSENTIAL TEE

All self-respecting clothing brands offer an everyday T-shirt. At Nimbus we call it Montauk. Made from the finest cotton, combined with a small amount of elasthane to maintain its shape and to ensure freedom of movement. Montauk can be used alone or combined with a shirt, jacket or sweatshirt, the possibilities are endless - in short, a must have in any wardrobe.

T-SHIRTS

MONTAUK

MEN

Fabric 95% combed organic cotton/ 5% elastane, single jersey

THE PIQUE TEE

The pique T-shirt Danbury is a unique piece, which can be used for a variety of occasions. It's a perfectly fitted T-shirt, made from the comfortable cotton-elasthane fabric we use for our popular Harvard polo. The fabric adds more shape, which prevents it from curling and makes it feel extremely comfortable against your body. Overall, Danbury gives a classic well-dressed look, and is therefore suitable as a substitute for a polo or a shirt.

RAW AND STYLISH DENIM SHIRT

Torrance is our take on the classic denim shirt, which has had a comeback the last few years. We have toned down the roughness and added more elegance and style, e.g. by adding a button-down collar in the male version and shaded dark blue buttons and a feminine cut in the female version. Torrance comes in a deep beautiful indigo blue, the fabric has a bit of stretch and the design is the classic Nimbus Slim Fit.

SIZE GUIDE

FINDING THE RIGHT SIZE

To ensure your complete satisfaction, we recommend that you check your measurements against our sizing chart to determine the right size for you. Make sure to measure directly on the body and then find your size in our size guide.

All measurements are in centimeters.

Feel free to contact our Customer Service at **customerservice@nimbusnordic.com** if you have additional questions about our sizes.

HOW TO MEASURE

NIMBUS ACADEMY

WHAT IS NIMBUS ACADEMY?

Nimbus Academy is an education platform primarily targeted our sales force, external partners and our key customers. The goal is to expand the overall knowledge about the most interesting topics in our industry.

A well-trained sales force

COTTON KNOWLEDGE

HIGH QUALITY COTTON

We choose our cotton and its processing carefully to make sure we offer high quality cotton.

LONG STAPLE COTTON

There are two broad groups of cotton; long staple cotton and shorter staple cotton. Long staple cotton yields extra-ordinary long fibres and is known for weaving strong, soft and durable high-quality fabrics due to its superior strength and uniformity.

The use of high quality long staple cotton in all our products is one of the reasons our cotton products stand out from the crowd.

COMBED COTTON

Combed cotton is made by treating the cotton fibers before they are spun into yarn. The harvested cotton is applied on to fine brushes (the 'combs') to clean away impurities and any short fibers. Roughly 15% of the volume is removed this way, and leaves only long, straight fibers.

The slivers of combed cotton are then spun into thread. As a general rule, combed cotton is more expensive than conventional carded cotton.

RING-SPUN COTTON

The yarn that is created for ring-spun cotton, is spun in a way that produces stronger and longer threads, as it is continuously twisted and thinned to make an extra-fine string of fibers.

During this process, the threads are compacted in a way that produces a very strong and durable material. The more times the fiber has been spun and twisted, the softer it feels. Open end yarn that is not ring-spun often result in a fabric with a rough texture.

INSULATION KNOWLEDGE

THERMAL INSULATION

Protection against cold is dependent upon thermal resistance or thermal insulation of the garment. Sorona® fibers provide high thermal insulation while retaining optimal warmth with less filling and weight, creating a more comfortable garment.

SORONA® FIBER

At Nimbus we use top of the line materials in our products, and with Sorona® Aura we offer lightweight, breathable and warmth features with sustainability in mind.

Sorona® Aura fiber is an eco-efficient performance fiber. It is partially plant-based and can be recycled in any normal polyester recycling stream.

The main benefits for the consumer are seen over the life of the garments, as Sorona® based fabrics maintain a high level of stretch, recovery & colour fastness wash after wash.

PATENTED TECHNOLOGY

Sorona® is produced with PDO, a building block with endlessly versatile potential, and using a biological process. 37% of the polymer is made using annually renewable plantbased ingredients. The revolutionary Bio-PDO compound turns a formerly chemical process into an eco-efficient biological one.

INSULATION VALUE OF YOUR CLOTHING

50 % higher CLO value = Higher warmth than non branded insulation

MERINO BLEND KNOWLEDGE

BIELLA YARN BY SÜDWOLLE

For our Merino wool blends, we have chosen Biella Yarn by Südwolle as our yarn supplier.

MERINO WOOL

At Nimbus we use top of the line materials in Biella Yarn is the premium label of the family owned company Südwolle Group. The name refers to the town Biella in northern Italy, which has been leading the manufacturing of wool since the 1800s.

Biella Yarn offers some of the highest quality Merino yarns available on the market - spun from Merino wool, which is a finer and softer wool than regular wool and sourced from Merino sheep. Merino sheep has developed the softest and finest fleece, and with modern day spinning technology and fibre treatments, merino wool makes outstanding fabrics and final garments with both style, comfort and performance brought together in perfect harmony.

OUR MERINO BLENDS

Südwolle has specialized in spinning, dyeing and blending wool with other fibres, and their yarns have the latest eco certifications including Bluesign and Oeko-Tex standards.

In our Nimbus merino blend program, the yarn is made of 50% Biella yarn and 50% anti-pilling acrylic which ensures that the knit keeps its fit. The fine merino blend gives the knit a soft, light and luxurious touch. Furthermore, the yarn is top-dyed, which means that the fibres are dyed before spinning the yarn - compared to yarn-dyed, where the yarn is dyed after spinning. This gives the yarn a super soft touch.

Biella Yarn
BY SÜDWOLLE

MERINO CASHWOOL® KNOWLEDGE

TOP QUALITY YARN FROM ZEGNA BARUFFA

For our 100% Merino cashwool® products, we have chosen Zegna Baruffa Lane Borgosesia as our yarn supplier.

MERINO WOOL

Products in 100% Merino wool are made in top-quality material. Merino Wool is a natural material shorn from Merino Sheep, which is a breed characterized by its very fine and soft wool – the thinner and soft fibres make Merino a premium material and one of the most popular, high-quality wools for knitwear. Merino has high levels of warmth, breathability and softness against the skin.

ZEGNA BARUFFA

Zegna Baruffa is a stamp of quality. The company Zegna Baruffa Lane Borgosesia is considered one of the leading spinners from the Biella area; Italy's wool capital. They offer some of the highest quality Merino yarns available on the market by combining manufacturing tradition with technological innovation and the value of Italianness with international perspectives. Sustainability is a central value within Zegna Baruffa, and through-out their history, they have won several awards for ethical and social practices. All their products are evaluated in compliance with the Reach regulation and are Oeko-Tex certified.

DOWN KNOWLEDGE

NATURAL INSULATION

Down is known for its impressive warmth-to-weight ratio, compressibility and overall comfort. In terms of warmth, nothing can rival down. Not even the best synthetics on the market that have been specifically engineered to simulate the qualities of down.

WHAT IS DOWN?

Down is the layer of “feathers” that are closest to the bird's body. Down is a very small part of the bird, grown as an undercoat on the belly and protected by a layer of feathers. Down is NOT the same as a feather. It has a completely different structure.

WE USE
10%
FEATHER FILLING

WE USE
90%
DOWN

t to a bird's
owing as
layer of
It has a

DOWN FILL POWER

Fill power refers to the quality of down. Fill Power is simply a measurement of loft, measuring the amount of air trapped in cubic inches per 30 grams of down. Fill power does not refer to the amount of down used. The higher the number (800 fill, 700 fill, 600 fill etc.), the better the down and the more loft and warmth it will provide.

NO LIVE PLUCKING

DOWN AND FEATHERS ARE NEVER
REMOVED FROM LIVE BIRDS

We have a NON LIVE-PLUCKED Guarantee
certificate from our down supplier.

SUSTAINABILITY

SUSTAINABILITY IS A KEY PRIORITY AT NIMBUS.

At Nimbus Nordic A/S we continuously take new steps to strengthen our practices and become even better at what we do.

One of our absolute key priorities is to design and create products with sustainability in mind.

We aim at minimizing the impact on the environment and protecting the well-being of future generations.

In order to live up to our CSR & Sustainability strategy, we are very selective about who we cooperate with. By using audits and assessment tools to select and monitor factories and by favouring fewer partners over many, we build long-lasting and close partnerships with our suppliers.

We strive to implement a sustainable and ethical approach throughout our complete supply chain, for example, all our products are covered by REACH*, 93% of our styles are produced on Amfori* audited factories, and many of our products have obtained product certifications, which are explained further on the following pages.

**REACH is a European Regulation concerning chemicals and their safe usage.*

**Amfori is the leading global business association for open and sustainable trade.*

PRODUCT CERTIFICATIONS & STANDARDS

As a validation of our sustainability efforts, many of our products have obtained product certifications, and below we explain the different certifications and recognized logos. The list even includes some symbols we have designed ourselves to signal how a product has been made with sustainability in mind.

OEKO-TEX® STANDARD 100

STANDARD 100 by OEKO-TEX® is one of the world's best-known labels for textiles tested for harmful substances. It stands for customer confidence and high product safety. Clothing manufactured under the principles of OEKO-TEX® meets requirements for pH value and content of harmful substances, such as pesticides and heavy metals.

STANDARD
100

CERTIFIED ORGANIC COTTON

Organic cotton is cotton grown without the use of synthetic pesticides, artificial fertilizers, and other toxic chemicals. By law, organic cotton plants cannot come from genetically engineered seeds, and strict regulations dictate how cotton must be grown to be certified organic.

CHANGING TO

We are currently working to improve our organic labelling, so our products comply with an even better, stricter, and more comprehensive standard called OCS.

OCS

The Organic Content Standard (OCS) is an international, voluntary standard that provides chain of custody verification for materials originating on a farm certified to recognized national organic standards. The standard is used to verify organically grown raw materials from the farm to the final product.

OCS 100

Applies to products made from at least 95% organic cotton mixed with conventional cotton or synthetics materials. The cotton used must be certified 100% organic.

OCS BLENDED

Applies to products made with a minimum of 5% organic cotton mixed with conventional cotton or synthetics materials.

SPANO NON-IRON TECHNOLOGY

A softness of touch and ease of ironing have always been top priorities for us at Nimbus Nordic A/S, and we have applied a special treatment to our business shirts.

The Spano Advanced cotton technology takes non-iron a step further. With the SPANO Advanced cotton technology we are able to deliver Oekotex-certified fabrics for our non-iron shirts.

The "Advanced cotton" technology allows to influence the core of the fibres from inside themselves. And instead of using conventional methods, applying a chemical onto the finished product, this Inside Cross Linking technology results in an extremely high recovery and guaranteed flattening after wash. The joys of non-iron products are many.

SPANO
SUPER NO-IRON

BIONIC FINISH® ECO

BIONIC-FINISH® ECO represents an ecological technology and unique non-halogenated, APEO-free, fluorine-free formulations for permanent water repellent finishing. This ecological water-repellent impregnation offers a variety of consumer-friendly features such as rejecting water and aqueous soiling substances, being washable and suitable for all fiber types. It has the advantage of not having any negative effect on breathability, no fluorinated compounds and being formaldehyde free.

 **BIONIC
FINISH® ECO**

SUGENRO®

GRS approved Sugentro® fiber is made from recycled polyester and gives a padding which guarantees warmth and breathability, while being environmentally friendly.

MADE WITH
SUGENRO®
INSULATION

RECYCLED FABRIC

Recycled fabric uses mainly plastic bottles, packaging, fishing nets or textile waste as its raw material.

QUALITY CONTROL

MEETING INTERNATIONAL STANDARDS

We make sure to meet international standards by working with trusted partners, which function as global benchmark for quality and integrity.

Quality is essential for our brand and by simultaneously encouraging classic designs over innovative designs and simplifying future collections, we extend the life of our range and attempt to follow the philosophy of Slow Fashion.

As quality has our highest priority, all our productions are inspected locally by our own team or by third party agencies before shipped from production sites.

In China, we have our own facilities housing our loyal and valued col-leagues, who constantly monitor the product quality and factory performances.

Products that are made with a performance fabric/membrane, adding features like Water Resistance or Breathability, are tested to make sure they meet the demands. Such styles are tested by third party laboratories according to international standards.

TOBBY / CHINA OFFICE MANAGER

QIMA

QIMA represents a global leading quality control and compliance service provider, who secures, manages and optimizes the quality and compliance of our products and suppliers.

All auditors and inspectors of QIMA are managed by quality control and auditing specialists to ensure compliance with international standards.

INTERTEK

Intertek delivers Total Quality Assurance solutions for textile products. Their comprehensive services enable us to ensure quality and safety with precision.

At Nimbus we mainly use Intertek solutions for fabric and chemical testing.

SGS

SGS is the world's leading inspection, verification, testing and certification company.

At Nimbus we use the services from SGS for both fabric-testing and third party inspections on productions.

CODE OF CONDUCT

Our Code of Conduct lays out our principles, standards, and the moral and ethical expectations that our employees and third parties are held to as they interact with our organization.

Our Code of Conduct is a set of rules, principles, values, employee expectations, behaviours and relationships that we consider important and that summarize our commitment to sustainability.

We strive to make a positive difference to our social, environmental and economic responsibilities.

10

TO FOLLOW

- 1** Nimbus will support and respect the protection of internationally proclaimed human rights.
